

Environmental Policy

CMC Partnership (UK) Ltd is a management consultancy that has been operating since 2000 with offices in London and Monmouthshire.

The business offers cost-effective solutions to programme and project-based human resource needs. CMC people offer the qualifications and experience to plan and implement business and information systems change, working as an integral part of the client's team.

We recognise that in our day-to-day operations we impact upon the environment in a number of ways. We are committed to improving environmental performance, preventing pollution, and in supporting government policy for sustainable development.

CMC are proud to have achieved ISO 14001 accreditation in December 2007 and we strive to make continual improvement using our internal Environmental Management System to do so.

In particular we aim to:

- Integrate environmental management into our business activity
- Ensure compliance with all relevant local, national and international legislation and regulations.
- Monitor progress on a regular basis to identify strengths and weaknesses in order to highlight actions required to prevent deficiencies.
- Ensure all staff actively support our environmental programmes.
- Communicate our environmental policy to all interested internal and external parties and respond appropriately to requests for information.

We will seek to reduce our environmental impact and improve sustainability through improvements in the areas identified below, with the long term aim to become a carbon neutral company:

- The effective use of energy and other utility services that have an environmental impact.
- Waste management and in particular by reducing the amount of waste we send to landfill.
- The reduction of greenhouse gas emissions created as a result of our direct and indirect activities.
- Contract management and purchasing.

This policy will be reviewed at least annually and will form the basis of all future environmental improvements.
